The committee set the dates for the spring semester clinical experiences. See Attached.

The committee will meet the 2<sup>nd</sup> Tuesday of each month during the spring semester.

Amy Adkins came and discussed the question “what kind of data should we be gathering about clinical experiences and its possible impact on clinical sites?” This is a beginning conversation as the focus becomes clearer we may be gathering data. Ideas that were discussed were the benefits to faculty (staying aware of current trends in education, reflecting on best practices, gaining resources to use in the future) and to students (more “teachers” in the classroom). An idea was posed that the U-High students should be involved in this conversation as well as they would be a good source of how they are impacted by having the clinical experience teachers).

It was reported that the survey for the fall clinical experiences is up and running and we should be able to get that data early next semester.
