

#### 4 Instrucciones para el wiki

## Sign up

1. Go to the wiki address and click on 'Join this space.'
2. Type in your ulid and password. I will accept your request and you will automatically be able to edit the wiki.

## Word Document

Do following steps in a word document and save it. Put everything in the wiki at the end. DO NOT edit wiki while others are editing, you will lose your material. You'll still need to copy and paste from the word document. You won't be attaching the word document to the wiki.

1. Delete the English word and write a definition in Spanish in your own words for your word on the initial page. Write the definition in your own Spanish words, copying from wordreference.com or any other source will result in a zero for the assignment.

In the link to your word...

2. Use the word in a Spanish sentence in which the meaning of your word is clear and could be ascertained from the sentence.
3. Write a memory trick that will help your classmates remember your word. This can be written in English.
4. Put in an image that corresponds to the meaning of your word and does **not** contain English. Remember that your image needs to be school appropriate. It's best to save images from Google Images in your My Pictures folder and browse to insert them in wiki. Insert your image last because you will not be able to easily manipulate text once you have put in your image. In order for the image to work, it needs to be jpeg and not bmp. If the image you have chosen is bmp then open it in Paint (which is located in the Accessories section of Microsoft Office) and SAVE AS jpeg.
5. Write you name in Spanish with the first letter or your last name. Ex. Diego G
6. After Sra. Orrego has made suggestions, correct errors and repost.
